REASONS FOR ALLOWANCE

1. This action is responsive to communications: Request for Continued Examination and IDS filed on 12/14/2004 and Drawings filed on 03/14/2005.

Information Disclosure Statement

2. The Information Disclosure Statement submitted on 12/14/2004 has been reviewed and does not change the position of the examiner regarding the reasons for allowance as they were previously presented which can be seen below.

3. The following is an examiner's statement of reasons for allowance:

Regarding amended independent claim 1, none of the references, either singularly or in combination, teach or suggest to a person of ordinary skill in the art at the time of the invention the amended features, "...a typical article selection unit selecting one or more articles from articles belonging to each of the selected groups and designating the articles as typical articles of the group ... wherein the topicality degree of each related article group is calculated based on a total number of articles and a number of information sources are calculated for each related article group, wherein the related article group with the topical degree exceeding a predetermined threshold value is selected as a key related article group, and wherein the typical article is selected for each selected key related article group belonging to the key related article group based on a requirement set by the user." The examiner notes that while a news information system which classifies articles based on similarity is not in and of

itself a novel feature (See Examiner Referenced Patents), but in combination with the other limitations of the method steps and system functions of the independent claim (i.e. wherein the topicality degree of each related article group is calculated based on a total number of articles and a number of information sources are calculated for each related article group) the limitations of claim 1 are considered novel, and unobvious to a person of ordinary skill in the art at the time the invention was made in view of the prior art of record.

In regards to independent claims 15, 17, 19, and 21, the examiner notes that said claims are substantially similar to independent claim 1 and recite system and method versions of the same limitations.

In regards to independent claim 23, the examiner notes that the claim is substantially similar to claim 1 and simply recites a more detailed version of claim 1, thus it is allowable for the same reasons as claim 1.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
